Read the passage below and answer question 7 and 8 based on the passage:

After a long time man invented something which changed the system of transport in the world. It was the wheel. Yes, the same that you see in bullock carts, a bicycle, a bus and a train. Today, it appears such an ordinary thing that one does not treat it as a invention. But man took a long time in making this small object and understanding its utility. Formerly heavy loads had to be carried by men or animals. One can well imagine how difficult it was Then someone must have realized that a round moves faster than flat one. The first cart must have looked like a wood fitted with round wooden pieced. Removing the wheel from our life would mean bringing the entire civilization to a halt.
7. The wheel does not look like a major invention because:
  - A. The use of the wheel is a recent thing.
  - B. It was invented a long time ago.
  - C. Its use has now become very common.
  - D. All vehicles have wheels.
8. If wheels are removed from our lives
  - A. Man will not be able to work at all.
  - B. We will have no work.
  - C. Present civilization will come to an end.
  - D. Life will become very risky.
