

MHT CET 12th October 2020 Shift 2 Memory-Based Questions (Chemistry)

What is Lithium Amide?	Which of the following is an additional polymer?
A Question on Ore of Magnesium	There was a question on dimensions of Magnetic Intensity
There was also a question on Conductivity	There was a question on Grignard Reagent Aldehyde
From p-Block elements, there was a question on Structures	What is Bakelite is made up of?
IUPAC - 4 Bromo, 3, 6, 6, Trimethyle Octane	There was a question on Isomerism (question-related to find out Geometrical Isomerism)
There was a question related to Lanthanide Contraction	There was a question on Isotonic Solution

Topics with High Weightage in Mathematics

Integration	Circles
Conics	Continuity
Vector 3D	-

Topics with High Weightage in Physics

Ray Optics	Kinetic Theory
Rotational Motion	Electrostatics

Topics with High Weightage in Chemistry

Solution	p-Block Elements (5-6 Questions)
Physical Chemistry	Organic Chemistry
