

GATE Instrumentation Memory-Based Questions 2021 – CollegeDekho

Name of the Subject	Questions from Topics
Engineering Mathematics	Complex variable probability density, limit, determinant function
Digital Circuits	ATOD or D/A converter, flash type ADC, multiplexer
Control System	Time response analysis
Signal and System	Laplace transformer, basic properties of signal
Network Theory	
Analog Electronics	Application of op-amp amplifier
Communications	
Measurements	AC, Bridge
Transducers	Pressure measurement, temperature measurement, resistive, capacitive and inductive transducer

More & exact questions will be added in the same link on the basis of availability
