

GATE 2021 CE-1 Memory-Based Questions - CollegeDekho

Questions	Questions
<p>Which is not correct -</p> <p>Traversing is carried out for a close traverse PQRS. The internal angles @vertices PQR & S are measures 92 degrees, 68 degrees, 123 degrees, 77 degrees respectively. If F.B of line PQ = 27 degrees. FB of lines Rs =?</p>	<p>There is a question on Mirror Image in Mathematics</p>
<p>There was a question on Steel related to Bolt</p>	<p>There was a question on basic probability</p>
<p>All numbers has same Aixal Rigidity - $R= 500 \times 10^3$ P=150 KN, L=3m Magnitude of Horizontal Displacement of Joint</p>	<p>Highway questions:- Space mean speed ,Webster method cycle time,position ratio question</p>
<p>$V = 70 (1-0.7k)$ determine the time had way maximum traffic volume</p>	<p>Total time loss as given as 3 second per phase. Number of phases are two determine the optimum cycle length if y_1 and y_2 are given as 0.47 and 0.3 respectively</p>
<p>The most preferred curve for vertical alignment is.....</p>	<p>Spot Speed 40, 55, 60, 65 and 80 km/hr. Calculate mean speed</p>
<p>Calculate the ratio of vertical force by horizontal force?</p>
