

GATE 2021 ES Memory-Based Questions – Version 3 – CollegeDekho Exclusive

Ph = 6, where Cl ₂ most effective	Reduce, Reuse, Recycle, Energy Recovery
There was a question based on Sodium Absorption Ratio	Type 1 settling sedimentation tank
There was a MPN related MSQ	O ₃ is not the primary pollutant
There was a question based on Microgram/m ³ to ppmv	Conc > 30 Degree
F/M = 31	There were questions based on Kyoto Protocol, Basel Convention, Stockholm Convention
Ph=2 for 10 mg per lit conc	Question based on sodium absorption ratio
Ionic strength related question	Based on solubility question
Based on alkalinity question	In Maths 2 question from limit
In noise pollution ans was $20 \log(P_{rms}/p_0)$	-
